### Summary

As an experienced software engineer, I specialize in developing and maintaining efficient and secure web applications using the latest technologies. With expertise in full-stack development, object-oriented programming, database design, software testing, and machine learning/deep learning, I am committed to delivering high-quality results. I'm passionate about creating robust and user-friendly applications that meet client requirements and provide a seamless user experience. I'm a quick learner, enthusiastic about exploring new technologies, and always eager to take on new challenges. With my strong analytical skills and attention to detail, I'm confident in my ability to make a valuable contribution to any team.

### Skill Highlights
