Summary

As an experienced software engineer, I specialize in developing and maintaining efficient and secure web applications using the latest technologies. With expertise in full-stack development, object-oriented programming, database design, software testing, and machine learning/deep learning, I am committed to delivering higah-quality results. I'm passionate about creating robust and user- friendly applications that meet client requirements and provide a seamless user experience. I'm a quick learner, enthusiastic about exploring new technologies, and always eager to take on new challenges. With my strong analytical skills and attention to detail, I'm confident in my ability to make a valuable contribution to any team.

Skill Highlights

- Time Management
- Teamwork
- Problem Solving
- Clean Code
- Innovative
- Communication

Experience

Web Developer at Expora Global Consulting, Remote, May 2020 - 2021
- Developed back-end web applications using Node.js, delivering 4 successful projects, including e-learning platforms, e-commerce websites, and various web applications.
- Collaborated with cross-functional teams to complete front-end and back-end development tasks, including writing efficient and well- documented server code.
- Performed thorough quality assurance testing to identify and rectify errors, ensuring optimal usability for end-users.

Freelance Web Developer, January 2021- Present
- Developed a wide range of projects, including web scraping, text mining, and deep learning projects, as well as building 5 web applications for clients (Ted Web Scraping, Sign Language Recognition , Refugee Ontology, University of Toronto Conferece: (https://csse.utoronto.ca/oss2023) (in progress)).
- Expertise in React.js, Node.js, MongoDB, Express.js, and various other technologies (Book Online Store MERN Stack, Share Memories Social Media Application).
- Collaborated with clients to understand their requirements, deliver projects within tight deadlines, and provide post-delivery support as needed (for more pojects see MyPortfolio).
